Welcome Message from the President of the Cyprus Society of Cardiology

On behalf of the board of the Cyprus Society of Cardiology and the members of the Organizing Committee, it is with great pleasure that I welcome you to our annual cardiology meeting, the 26th International Conference "Cardiology Today" which will be held on 24 & 25 March 2018 at the Hilton Park Hotel in Nicosia.

During this Conference, the participants will have the opportunity to participate in an innovative scientific program, which includes Debates, Round Table Discussions and Satellite Symposia covered by a distinguished international faculty of experts on current topics in cardiology.

The International Cardiology Conferences, known as 'Cardiology Today', have been organized since 1979, and along with the Cypriot-Hellenic seminars that were later institutionalized, they constitute the crown jewel of the scientific activities of our society and are still recognized for their undeniably high level. Our international accredited faculty is living proof of that fact. Furthermore, the registered participants of the conference increase year after year while their backgrounds derive from beyond the boundaries of cardiology, a firm acknowledgment of the quality of the conference amongst the wider medical community.

It is widely accepted that our meeting offers an unparalleled opportunity to network with and learn from the preeminent leaders in cardiovascular science and clinical practice.

For these reasons and many more, I hope you'll join us in Nicosia this March.
